

Dr. A.P.J. Abdul Kalam, popularly known as the "Missile Man of India," was one of the most respected scientists and leaders in India. Born on October 15, 1931, in Rameswaram, Tamil Nadu, he came from a humble background. Despite financial challenges, he pursued education with determination and excelled in physics and aerospace engineering. Kalam played a pivotal role in India's civilian space program and military missile development. He was a key figure in the development of India's first satellite launch vehicle (SLV-III) and guided several missile projects like Agni and Prithvi. His contributions earned him the title "Missile Man of India." In 2002, he became the 11th President of India and served until 2007. Known as the "People's President," he was loved for his humility, vision, and connection with the youth. He continuously encouraged students to dream big and work hard to achieve their goals. Kalam received numerous awards, including the Bharat Ratna, India's highest civilian honor. His life is an inspiration to millions around the world.

Apart from being a scientist and president, Dr. Kalam was also a great teacher and author. He wrote several books such as "Wings of Fire," "Ignited Minds," and "India 2020," which continue to inspire young minds across the globe. He believed strongly in the power of education and innovation. His vision for India was to transform it into a developed nation through science and technology. He often interacted with students and motivated them to pursue careers in science and contribute to national development. Dr. Kalam was known for his simplicity and disciplined lifestyle. Even as the President, he maintained a modest way of living and focused on serving the nation. He passed away on July 27, 2015, while delivering a lecture at the Indian Institute of Management Shillong. Even in his final moments, he was doing what he loved most—teaching and inspiring others. Dr. A.P.J. Abdul Kalam's legacy continues to live on through his teachings, books, and the countless lives he inspired. He remains a symbol of knowledge, humility, and dedication.
